

Southern VALVE Service, Inc.

HF Alkylation Valve Repair

Factory Authorized HF Alkylation Valve Repair

Southern Valve Service maintains two fully equipped valve and actuator remanufacturing facilities in Baton Rouge, Louisiana and Deer Park, Texas to provide service to HF Alkylation units located throughout the USA and Caribbean. Southern Valve Service is recognized by most valve OEMs that produce these critical service valves.

Southern Valve Services has specialized in the repair of HF Alkylation valves for 26 years. Our repair facilities information management system collect and maintain detailed data for each valve from its as-received condition through the subsequent remanufacturing. Every remanufactured valve and actuator has full traceability to document your OSHA compliance, and to aid your reliability engineers. www.southernvalve.com
