

Southern VALVE Service, Inc.

Delayed Coker Units

Delayed Coker Isolation and Switching Valve Repair

Southern Valve Service maintains two fully equipped valve and actuator remanufacturing facilities in Baton Rouge, Louisiana and Deer Park, Texas to provide service to Delayed Coker Units located throughout the USA and Caribbean. Southern Valve Service has a long experience with the repair of **Wedgeplug™**, **Wilson-Snyder™** and **Poyam™** brands and is authorized by **Velan** to remanufacture its complete product line of delayed Coker ball valves.

Applications include: Inlet transfer line, Drain, Heater Isolation, Blowdown, Vent, Bypass, Quench, Overhead Vapor, Backpressure Control and Hydrodrill water cutting.

Size and Pressure Class:

4-way switch- Size 6-14 / Class 300-900

Isolation – Size 6-36/ Class 150-900

HP Water Valves- Size 2-8/ Class 1500-2500

Southern Valve Services has specialized in the repair of Coker valves for 26 years. Our repair facilities information management systems collect and maintain detailed data for each valve from its post installation condition through the subsequent remanufacturing. Every remanufactured valve and actuator has full traceability to document your OSHA compliance, and to aid your reliability engineers.
